

# The Daily Freeman.

VOL. 1.

CITY OF KINGSTON, (RONDOUT,) N. Y., TUESDAY, JUNE 25, 1872.

NO. 213.

## THE DAILY FREEMAN,

PUBLISHED EVERY MORNING.

Sundays excepted.

BY HORATIO FOWLES,

at the  
Newkirk Building, Division St.,  
City of Kingston, (Rondout, N. Y.)

The DAILY FREEMAN will be an Independent public Journal, with an opinion on every subject, firm in its advocacy of freedom, equal rights and just laws for all men; outspoken in its position to the abuses and follies of the day; in favor of progress and improvement everywhere; and especially devoted to the interests of the City of Kingston and vicinity.

The Telegraphic News Department will be complete and well supplied, the FREEMAN being a MEMBER OF THE NEW YORK ASSOCIATED PRESS, through which it receives and is enabled to present a full summary of intelligence from all parts of the world every morning.

Local News and especially City, Town and County News will receive special attention, paid correspondents being employed in all parts of the county. All news received from other than our regular correspondents will be paid for if useful. Full reports of all important meetings will be presented, and in every respect the DAILY FREEMAN will be a First-Class Paper and a worthy companion of the WEEKLY FREEMAN.

Commercial and Stock Reports carefully corrected every day.

THE DAILY FREEMAN will furnish for the breakfast table of its patrons the News from All Parts of the World up to 3 o'clock A. M.

Terms—Six Dollars per year, payable invariably in advance. If collected weekly, Fifteen Cents per week. Single copies four cents. Advertisements will be displayed as ordered, and charged according to the space occupied, measured in inches down the column.

HORATIO FOWLES,  
Editor, Proprietor and Publisher.

THE WEEKLY FREEMAN, a large, well-filled paper, will be sent to subscribers at \$2 per annum, payable in advance. HORATIO FOWLES,  
Editor, Proprietor and Publisher.

JOB PRINTING in all its branches Promptly, Cheaply and Neatly Done. By the use of STEAM Presses and a large force we are enabled to turn out work at a rate that defies all competition. We have facilities for printing Law Cases unequalled between New York and Albany.

HORATIO FOWLES, Proprietor.

Romance of a Teachers' Institute.

For obvious reasons the following, which we find in the *Middleton Mercury*, was not inserted in the record of the proceedings at the Orange County Teachers' Institute, held here last summer:

In August last among others attending a convention of teachers, held at that time in Newburgh, were a young lady from Middletown, a daughter of a prominent and eloquent clergyman of that place, and a young gentleman residing not far therefrom. These two members of the convention had somehow found each other's society by no means disagreeable, and finding themselves together in a pleasant town at a sort of social meeting for several days, improved the opportunity to make still firmer their friendship and regard for each other. In this it would appear that they were quite successful. In fact it is fair to presume that they had advanced so far as to be decidedly and desperately in love. While in this condition the hazy picture of the Romance of the occasion, sick and alone in the distant clime of Ohio, to which he had intentions of soon migrating, in some way became vivid before the minds of both and the necessity of Juliet being on hand to sooth his fevered brow was of course instantly admitted. But it then occurred that without due ceremony of marriage such a thing would hardly be correct and proper, and it was resolved to provide for any such contingencies on the spot. So to a clergyman the parties immediately went, and were duly announced and pronounced man and wife.

Instead, however, of going out to the west, getting the fever and ague and writing to the wife of his bosom to come out at once and attend to his wants, our school teacher and husband went back from Newburgh to his home near Middletown, and staying there, remained so remarkably healthy that there was no occasion whatever for her to visit him and soothe his fevered pillow; while she remained at her home and said nothing to any one about the quiet little ceremony which had taken place in the Newburgh clergyman's front parlor.

Our friends were of course much together after this, but it was only understood that the gentleman was "paying attentions," and no one for a long time dreamed that they were actually married. Finally, however, the lady's father thought the gentleman seemed to act as though he was one of the family, and a suspicion was dawning on him. He one day boldly asked the lady if she was married. There was a little confusion, but she promptly admitted that she was, and quickly produced a marriage certificate, which fully set forth the necessary details of the event. The right of the gentleman to be claimed as one of the family was at once duly recognized, and everything was made satisfactory to all concerned.—*Newburgh Journal*.

Remarkably Irregular Conduct of a Detroit Corpse.

Six or eight weeks ago a family named Vhesty, consisting of husband, wife and a child, came to this city from Macomb county, and rooms were engaged at the house of a Bohemian named Lidwest. Vhesty, up to a week ago, worked in a lumber yard, but he was taken ill one day and had to go home. The doctor pronounced the case typhoid fever. The patient received no help from the medicine, and soon after died in some sort of spasm. James Havlemeyer and August Wolf dressed the corpse for the grave. It was the intention to have the body conveyed to Macomb county and entered beside a dead son, and a team was engaged for that purpose.

Vhesty had a week's growth of hard beard on his chin, and a young man named Fremm volunteered to remove it. He had worked with the dead man at digging a cellar, and the two had something of an acquaintance. The body had not been put into the coffin yet, and there were in the room when Fremm commenced operations with the razor the men who dressed the corpse, the widow and a neighbor woman. Fremm applied the razor, and at length began using the razor. He had not taken about three or four strokes, when the dead man raised his arms, moved his body and tried to sit up. The woman ran, but one of the men put his hand under Vhesty's head and helped him so that he sat up. He opened his eyes, looked at Fremm, and distinctly uttered the words: "What's the matter with me, Fremm? I feel very queer!" One of the women, who had returned to the door, twelve feet away, plainly heard the words. He seemed to want to speak further, but gasped for breath, closed his eyes and fell back. His heart continued to beat for three or four minutes after, and then the man died for the second time.

How the Little Lady Did it.

Goldsmith Maid in her last trot against Lucy on Wednesday made the quickest time in the world. The feat was accomplished in the second heat as follows:

The track was scraped next the pole, and it was given out that the Maid was to be sent for time. The word was given on the second trial, the Maid being near an open length in advance, and both going very fast. Around the turn the Maid opened two lengths the best of it, and had a lead of that distance at the quarter in thirty-four and a half seconds. They kept the pace up as they went up the stretch side, the Maid making one slight break and leading three open lengths to the half in 1:07 1/2. People looked at the Maid as she kept her head good around the upper turn. Lucy trotted very squarely all the way, and as they entered the home stretch she put on a burst of speed that carried her closer to the Maid than she had been since the mile began. Mr. Doble called on the Maid and she responded with a tremendous dash from the distance flag to the wire, and as she crossed the score three lengths in advance those who had held watches on her were confident she had beaten herself, and when the judges hung out the time as 2:16—the fastest on record—there was loud applause from the spectators. There were five watches in the stand. Four of them made it 2:16; the other stopped on 2:17.

How to Get Good Raspberries.

Comparatively few people ever eat a really good raspberry. To have this delicious fruit in perfection you must raise it in your own garden and take a little pains with it. We do not now propose to go into the general subject of planting, pruning, and managing raspberries, but simply to throw out a few hints that may be of practical value at the present time.

Raspberries require very rich land, and it is not too late to fork in some well-rotted manure between the rows. If this can not be obtained, sow about three pounds of some good artificial manure to the square rod, and work it into the soil with a pronged hoe. A spade should never be used among raspberries. Keep the ground as clean and mellow as possible. Weeds pump up large quantities of water out of the soil. Suffer none to grow. And recollect that a raspberry sucker that is not needed is simply a weed, and should be treated accordingly. You want four strong suckers to each plant to form canes for next year. All the rest unless needed to form new beds, should be killed as soon as they show themselves. This is a very important point in raising large delicious raspberries. As dry weather approaches, the land having been repeatedly stirred to kill weeds, mulch the ground thickly with the clippings of the lawn or other material, to prevent the evaporation of moisture.—*American Agriculturist*.

Keep the ground as clean and mellow as possible. Weeds pump up large quantities of water out of the soil. Suffer none to grow. And recollect that a raspberry sucker that is not needed is simply a weed, and should be treated accordingly. You want four strong suckers to each plant to form canes for next year. All the rest unless needed to form new beds, should be killed as soon as they show themselves. This is a very important point in raising large delicious raspberries. As dry weather approaches, the land having been repeatedly stirred to kill weeds, mulch the ground thickly with the clippings of the lawn or other material, to prevent the evaporation of moisture.—*American Agriculturist*.

How to Get Good Raspberries.

Comparatively few people ever eat a really good raspberry. To have this delicious fruit in perfection you must raise it in your own garden and take a little pains with it. We do not now propose to go into the general subject of planting, pruning, and managing raspberries, but simply to throw out a few hints that may be of practical value at the present time.

Raspberries require very rich land, and it is not too late to fork in some well-rotted manure between the rows. If this can not be obtained, sow about three pounds of some good artificial manure to the square rod, and work it into the soil with a pronged hoe. A spade should never be used among raspberries. Keep the ground as clean and mellow as possible. Weeds pump up large quantities of water out of the soil. Suffer none to grow. And recollect that a raspberry sucker that is not needed is simply a weed, and should be treated accordingly. You want four strong suckers to each plant to form canes for next year. ## The Constitutional Changes.

Governor Hoffman has appointed thirty-two commissioners to propose amendments to the Constitution of our state. In selecting them he has discarded partisan ends by appointing sixteen Republicans and an equal number of Democrats. This lifts any suggestions which they make out of the slough of politics, and will put their propositions before the people on their merits, giving no chance to schemers to appeal to passions and prejudices to defeat wholesome changes in our fundamental law.

As we understand the originators of this commission there are, or will be, four important changes suggested. These will embrace the management of the Prisons, charitable Institutions, Canals, and the method of taxation. Of the first two it is not now our purpose to speak. Regarding the canals there is but one side. All except the Erie, Oswego and Northern are sinking funds of the state and should be sold. They don't pay either in cash or developing the country. That sums it all up. The other three should be placed on such a basis that they pay expenses and nothing more. As long as we retain them New York must be the emporium of America. They are the keys of Western Commerce.

Taxation is a pertinent issue, for it touches the tenderest of nerves, that of the pocket. The last Constitutional Convention submitted an article which read "For or Against equal taxation." The electors thought that meant money and real estate should be assessed in the same proportion, and voted it down. The real pith of it was that it proposed to exempt mortgaged premises to the amount of the mortgage. Had this been known, it would have been carried. With all our boasted intelligence, that question was decided through ignorance. Now it will be re-submitted with a better result.

## The Cost of Strikes.

For weeks past the workmen of New York city have been on a strike for "eight hours," which means that eight hours shall be considered a full day's work, and that for these eight hours of labor the workman shall receive as much as he has hitherto had for ten hours work. It is therefore practically a demand for twenty-five per cent. more wages.

This strike has been accompanied by some violent demonstrations, in which the employers' right to hire whom they please has been resisted, and men have been driven away from shops in which they desired to work and in which the employers wanted them to stay. The most outrageous of these demonstrations was one made against a firm of sugar refiners, which had erected machinery to make its own barrels and whose use of the same was disputed by the workmen with threats of destroying the mill. This is flat communism.

The lack of economy of strikes is forcibly shown by the statistics created by this one. These statistics are so convincing that every workman possessing common sense should be able to see that it is the most losing game he can go into. The cases in which the strike succeeds in getting an immediate rise of wages are very few, about equal to the chances of a lottery or gambling game. The strikes mainly result in altogether failing to procure an advance or in obtaining one after a long interval of idleness, in which no wages whatever are earned. In the first instance they are a dead loss, and the workman is short just so much money which he might have earned had he continued at work, while he has gained nothing in place of it. In tabulating the results of the New York strikes *The Tribune* estimates that employees have sustained a direct loss of \$1,674,950, and that if the strike continued a year there would be a loss of nearly forty-two millions to employer and employees.

But even what is called a successful strike is a losing operation to the workman. Supposing a man getting \$2 a day, strikes for \$2.50, and gets it at the end of two months. He loses in wages for that two months \$104, counting 26 days to the month. Commencing work at the end of the month it will take eight months steady labor for him to recover out of his advance the loss incurred in lying idle for two months, so that at the end of ten months he is just at the same point he was at the start, supposing no sick days have intervened. Now if the demand exceeded the supply sufficient to warrant the advance he would have received it anyway. If it is not, then the advance can only be maintained for a short time, so that long before he has had time to recover his lost wages by the advance the price tumbles again and he is just so much out of pocket.

For the amount of money our workmen lose in these strikes they must be very fond of paying for luxuries.

## Washing and Weather.

A lady told us yesterday that she intended to wash in the morning, but took the precaution to look at the weather report in *The Freeman* before she commenced. Finding there a prediction that it would be a threatening day, she deferred it. A neighbor woman went on with hers, and by noon was hurriedly taking her clothes off the line. This illustrates the benefits of the Weather Bureau in a way we had not thought of, while showing the necessity for every one taking *The Freeman*.

By the by, as harvest is coming, and it will be beneficial to farmers along the line of the New York, Syracuse & Kingston Railroad and the Delaware & Hudson Canal to know the prospects each morning, we will furnish the reports to the operators, provided the people interested will make arrangements to establish stations and get the telegrams. We await a response from those interested.

## POLITICAL NOTES.

Wigfall is for Greeley. Gen. Gilmer is for Grant. Tombs is against Greeley. Senator Patterson has been voted out of office, notwithstanding the two-term doctrine. The Democratic papers are pressing the enforcement of the two-third rule at Baltimore. The Texas and Alabama Democratic Conventions have declared for Greeley and Brown.

The *Tribune* claims that Greeley will have 517 votes on the first ballot in the Baltimore Convention. The Philadelphia Press shows figures that indicate that Hartnett will lose 11,499 Republican votes in 27 counties. Senator Fenton is in New York frantically summing up Chautauque and Cattaraugus counties, by the bushel.

"Nothing like leather" is to be Grant's war-cry, founded on the untiring on the ticket of Grant, "the Galena Tanner," with Wilson, "the Natick Cobbler."

Frederick Law Olmsted, who was nominated on the 21st for Vice President by a ticket of Free Traders, promptly declined the next day. He don't like the company.

An unfortunate error has been made by the Greeley Central Committee. It is announced that all the hats which have been procured are of the same size—7½—and Greeley himself will have to wear three-quarters of them.

## MISCELLANEOUS ITEMS.

The wedding of Miss Nilsson will take place next month.

Florida boasts this year are said to be as large as sparrows.

An Australian clergyman has been before a church court for preaching sermons other than his own composition.

A cat in Terre Haute regularly visits every traveling circus that comes to the place. She probably reflects that there is likely to be a "muss" on such occasions.

Some ungrateful way says that "when Tennie C. Claffin was married to James Barba, a furo banker, ten years ago, she was not more than twenty-five or thirty years of age."

Mr. Hart, of Utica, being unexpectedly visited by four ladies, each of whom claimed to be his lawful wife, made a precipitate exit through a second-story window. He was evidently the victim of too much Hart.

The Rothschilds are to hold a great family reunion next July at Frankfurt-on-the-Main, when, it is believed, important changes will be agreed upon in regard to the management of the branches of the great firm.

A man after Mr. Berg's own heart, in East Hartford, not only catches meat, but goes barbedotted all winter, because he has conscientious scruples about doing anything which may even indirectly encourage the killing of any animal.

Georgia fishermen lurk in lofty tree-tops overlooking streams frequented by trout, and shoot the fish with shot guns. By this means a ten cent mess of trout is frequently obtained at an expenditure of not more than twenty-five cents' worth of powder and shot.

Ah Hood, a Chinaman, was in the penitentiary of Idaho, serving out a five years' sentence, and he managed to escape; but justice has not been cheated, after all, exulting by the "wrong Chinaman," and getting out of jail at all—a fact that would never have been discovered, we suppose, if Ah Hood had not been so mean as to escape.

The estate of the late James Gordon Bennett is represented to be worth ten millions of dollars. The property on Washington Heights goes to his daughter, Jeanette, the residence on Fifth avenue to his widow, and the Herald and real estate connected therewith to James Gordon Bennett, Jr., who is obliged by the terms of the will to keep it in the family.

A gentleman of New York, who has a passion for pearls, labors under the singular hallucination that he shall some time find, when opening a box of oysters, a most valuable pearl that has yet been discovered. In pursuit of this hope he has opened during the past winter more than 30,000 oysters, disguising himself as a professional opener and working at the barges, but he has not yet found the pearl.

A Glasgow exchange informs us that specifications are at present in the hands of Clyde ship-builders for a new vessel to be built for the National Steamship Company, to run between Liverpool and this port, of dimensions second only to the Great Eastern. Her length is to be 376 feet over all, and she is to be fifty feet beam and thirty-five feet in depth. It is expected that the great steamship will make the voyage from port to port in seven days.

MENDING BROKEN LEGS OF HORSES.—We have read of a way of treating the broken legs of horses, which, if as good as asserted, might save many valuable animals, and should be generally known and proved. "A valuable horse in Hartford, Conn., had his leg broken recently. The leg was carefully set by an experienced surgeon, and covered thickly with plaster. When the plaster set or hardened, it kept the limb as immovable as if casted in iron. It is said that a broken leg thus treated will, in a short time, knit together and become as good as ever." This is at least worth a trial, and might save horses that their owners prize highly; if it does not succeed they are no worse off, and if it does they have saved their horses.

A sad and at the same time an unusual accident occurred in the town of Watkins Glen in Schuyler county on Saturday last. A party of ladies and gentlemen were walking in the Glen, enjoying its natural beauty, when an overhanging rock just above them became detached and rolled to the bottom with fearful velocity. It struck three or four of the party, killing one young lady almost instantly, and injuring the others very seriously. The names of the injured are not given, but the accident was a gloom over a spot, which is a favorite place of resort during the summer season.

There is considerable risk in seeking matrimony through newspaper advertisements, and there is also an uncertainty about it which months of ardent correspondence cannot remove. For instance, a youthful couple in Louisville lately fell over head and ears in love by this means, and a great number of tender epistles passed between them before either of them mentioned their real names. It turned out finally that they were brother and sister. They had been separated a number of years, and the exchange of photographs did not bring about a recognition.

## Associated Press Dispatches.

## BY TELEGRAPH TO DAILY FREEMAN.

## GREAT BRITAIN.

LONDON, June 24.

A severe storm accompanied by heavy thunder and remarkably vivid lightning was experienced in London and various other portions of England this morning. A cotton mill at Bolton, near Manchester, was struck by lightning, and some of the operatives were stunned, though none were severely injured. The Lord Nelson Tavern at Dover was also struck, and taking fire was burned. Many of the inmates were injured.

## FRANCE.

PARIS, June 24.

No appointment of a successor to M. Larey in the ministry of public works has yet been made. The Minister of commerce, who also acts as Minister of public works until the vacancy is filled.

## MEXICO.

MATAMORAS, June 24.

A courier has arrived in this city with dates from Saitillo to the 18th instant. Gen. Rocha with 3,000 government troops had reached that place from Sinaloa, uniting with the forces of Col. Lealito, and forming an army of 5,000 men to advance on Monterrey, where Quiroga and Trevino with the Revolutionists are entrenched. Gen. Ayala with 400 government cavalry has routed Vargas at Tulo, who pronounced a few days since at the head of a few hundred men. Large quantities of supplies and munitions of war left here to-day under convoy of 400 regulars for Camargo, to join Gen. Covallos, who is preparing for the advance on Monterrey, to co-operate with Gen. Rocha's force from Saitillo. The Revolutionists are supposed not to exceed 4,000 men at Monterrey, while the government forces under Generals Rocha and Covallos, approaching from opposite directions will amount to about 8,000. A decisive conflict is imminent at Monterrey with numerical strength largely on the side of the government, under command of Gen. Rocha, an officer most enterprising and successful.

## THE STRIKE.

NEW YORK, June 24.

The strike of the piano makers is ended, all the men having resumed work at ten hours. Those employed by Weber & Steinway, alone got an advance in wages, viz: ten per cent. The cabinet makers continue their meetings and still predict success for their strike in a few days. They received word from New Haven that the cabinet makers and various other trades in that city had formed an eight-hour league, which will contribute money for their support.

A large number of metal workers are in session to-day and listened to letters from Buffalo, Susquehanna and different points along the line of the Erie Railway, also from Boston and other cities, all of which gave encouraging accounts. The workmen are said to be making preparations in those places to continue the strike. The Singer Sewing Machine men to-day unanimously resolved to hold out indefinitely. They are connected with the metal workers' union, and assert they are abundantly supplied with funds.

The Employers' Central Executive Committee held a meeting this morning. It was voted to maintain the present attitude of the committee, and to establish an organization among journeymen to counteract the influence of the trades unions. Only a few officers of the 8 hour league represented that organization at Teutonia Hall to-day, but they spoke confidently of the success of the 8 hour movement.

## BUFFALO NEWS.

BUFFALO, June 24.

Notwithstanding the drizzling rain all day, there was an immense military, civic and Masonic procession here to-day to the site of the new city and county building, where the corner stone was to be laid. The entire procession was under command of Major Gen. Howard, Grand Marshal, and the streets through which it moved were crowded with spectators. Services at the ground consisted of music, prayer by Rev. Dr. Lord, an oration by Judge George W. Clinton, &c., after which the most Worshipful Christopher G. Fox, Grand Master F. & A. M. of the State of New York, performed the ceremonies of laying the corner stone according to the Masonic ritual.

Evidence is becoming stronger daily that a strike is imminent among the different trades organizations. The President of the International society with several representatives of the strikers in New York and Jersey City were here to-day. Two lodges of masons will hold private meetings to-night, and a public demonstration at the Opera House is talked of for to-morrow night.

Under an act of the last Legislature, the Canal Commissioners are directed to allot a distance on the Erie Canal, not less than five miles, to D. D. Williamson to experiment with his road steam engine for towing of boats. The Commissioners have set apart that portion of the canal extending from the lumber district in this city to West Troy. Experiments will commence on Monday the 1st of July, and continue three weeks, when all boats will be towed gratuitously.

## METROPOLITAN NEWS.

NEW YORK, June 24.

The sixth panel of a hundred jurors was ordered in the Stokes case. The only juror obtained to-day, making the tenth, was John Augustus, Leftitt Examiner, West 23d street. Judge Lyman Tremain appeared as one of Stokes' counsel to-day.

The fire marshal finished his investigation in the causes of the disastrous explosion on Liberty street Saturday, and has decided it was caused by the ignition of vapor from nitrous ether, from a gas jet.

The trial of Van Winkle Bogert, lover and alleged accomplice of Libbie Garabrandt in the murder of Ransom F. Burroughs at Patterson, will be postponed till September.

The will of James Scott, clothier, who bequeathed \$200,000 to Julia Scott his reputed wife, and Margaret Killis a servant, is contested by Caroline Scott, who claims that she married the testator many years ago, and was never divorced from him.

Mrs. Mary Myer brought action to recover \$20,000 damages from the Central Park North & East River railroad company, for injuries sustained six months ago by being thrown to the ground by a car starting suddenly.

W. L. Smith, a Nova Scotian, first mate of the Bark Maggie Reynolds, was severely wounded at a Brooklyn pier by a shot fired at river thieves by Samuel Dixon, second mate.

Judge Blatchford has granted an order for E. A. Heata & Co. of which firm James H. Ingersoll, (Tammany chair maker,) was principal partner, to show cause why they should not be declared bankrupts, and their estate divided pro rata among their creditors.

An explosion of fireworks occurred this evening at 36 Thompson street, whereby three Frenchmen were badly burned.

## THE NATIONAL CAPITAL.

WASHINGTON, June 24.

Contrary to reports from Geneva, it is ascertained from official source that no negotiations are in progress for the new supplemental treaty. Such a course is considered unnecessary in consequence of the decision ruling out of the tribunal claims for indirect damages.

During a recent conversation with President Grant, he said everything which had been done by Secretary Fish relative to the Treaty of Washington was done with his (Grant's) full concurrence, and therefore the responsibility of diplomatic action did not entirely rest upon that officer.

Gen. Crook reports to the Adjutant General's office under date of Prescott, Arizona, May 28th, that on the 22d of May the Indians killed a herder and captured two thousand head of sheep within a mile and a half of his headquarters. A party made pursuit and succeeded in recapturing the herd next day. Owing to the nature of the canon in which the command overtook the herd, though they charged immediately, the Indians escaped among the rocks and underbrush.

## STRANGE STORY OF POISONING.

ST. LOUIS, June 24.

A strange story of poisoning is reported from Herculago. A young man named Moore applied to the county physician for a prescription to cure the ague. The doctor gave him a dose which he took. He died shortly after reaching home. Drs. Resfield & Barnes who were called to attend Moore, swallowed some of the medicine to relieve the fears of Mrs. Moore, and the result was that both died in a short time. Investigation has not yet been made.

## OFFICIAL WEATHER REPORT.

WAR DEPARTMENT,  
OFFICE OF THE CHIEF SIGNAL OFFICER,  
WASHINGTON, June 25, 1 A. M.

## Probabilities.

Clear and partially cloudy weather and light to fresh easterly to southerly winds will continue north and west of the Ohio Valley, clear and clearing weather over Kentucky, Tennessee and the Gulf states with light to fresh winds; cloudy weather and areas of rain for the south Atlantic states with light to fresh southerly to westerly winds, and for the Middle and New England states with light to fresh winds.

## Commercial Reports.

NEW YORK MARKET.

NEW YORK, June 24.

LOOK AT THE FIGURES!

183,600 Machines per annum.

Many new machine companies have had their rise and fall—their machines once popular, now scarcely known—others have made radical changes in order to exist; while the Howe Machine Company have adhered to the opinion of "Elias Howe, Master of Mechanics." "The machine is mechanically correct; does not change," built addition after addition to their factory, and today cannot supply the demand, although turning out six hundred machines a day—just a machine a minute.

THE ELIAS HOWE, JR.,  
Sewing Machines  
MANUFACTURED BY  
THE HOWE MACHINE CO.

FOR FAMILIES AND MANUFACTURERS.

THE GREAT PRIZE:  
EXPOSITION UNIVERSIELLE,  
PARIS, 1875.  
Awarded over eighty-two competitors.

The Highest Premium,  
THE ONLY CROSS OF THE LEGION OF  
HONOR AND GOLD MEDAL.

Given to American Sewing Machines, per Imperial Decree, published in the "Moniteur Universel" (Official Journal of the French Empire), Tuesday, 20 July, 1875, in these words:

Fabricante de Machines a coudre  
Elias Howe, Jr.,  
exposant. Manufacture of Sewing Machines, Exhibitor.

The Howe Sewing Machines

Are celebrated and known for doing the best work, using a straight and true, equally needle for the same thread, and any other machine, the best adapted to any and all kinds of light sewing and manufacturing of every description, from fine lace to patent leather, making a beautiful and perfect Lock Stitch. Like on both sides of the article sewed, and will neither rip nor ravel, and uses less thread.

Every machine is as near perfection as the best machinery in the world can make it. It is the oldest machine and has more improvements, and is more perfect than any other machine, the best adapted to any and all kinds of light sewing and manufacturing of every description, from fine lace to patent leather, making a beautiful and perfect Lock Stitch. Like on both sides of the article sewed, and will neither rip nor ravel, and uses less thread.

They are offered as equal, if not superior, in tone and finish to any Piano Fortes sold in this country or elsewhere, and acknowledged the best and most reliable Pianos made, noted for standing in tune, wearing well, with deep, rich, sonorous tone, full iron frame, and all modern improvements. J. & C. FISCHER are practical workmen, and having very large Manufactory, with increased facilities, which they possess in the way of Room, Steam Power, and all kinds of Machinery, can supply a Superior Piano at reasonable price. 157m6

These Pianos are made of the best seasoned materials, and are finished throughout in the most thorough and workmanlike manner.
